

Creative Approaches to Learning

Unlock the imagination and energy inside every student with our creative learning workshop.

This workshop engages pupils and teachers through a series of multisensory and highly interactive presentations. These presentations show students interesting and unusual ways to learn and help schools develop a more creative curriculum.

Aims of the workshop

- To show young students that everyone can make learning fun
- To encourage students to use creative learning methods to better absorb and retain information

Benefits

All learners benefit from this workshop, regardless of ability or learning style. Students leave feeling enthusiastic about their learning journey, with higher aspirations and stronger self-belief.

Our learning-to-learn techniques can be used right across the curriculum, in all subjects and in both class and home learning. Students will be amazed at their new ability to retain information, while teachers report seeing a rise in self-esteem and self-belief among pupils during the sessions.

Workshop overview

In this workshop, students experience the power and effectiveness of creative learning techniques and are taught to use their imagination to remember facts and concepts more easily.

Workshop content

This interactive workshop combines effective mind-mapping practices with multisensory learning tools and 'Story Technique' and 'Journey System' models. This combination of tools and techniques results in a powerful creative learning experience.

It can be run in large groups (up to 100 students in each session). This means that a real impact can be made at cost-effective prices.

To accommodate larger numbers of students, we usually run these workshops in the school hall and teachers are actively encouraged to get involved and learn the techniques too.

Results

- Pupils learn powerful tools to improve memory and boost self-confidence
- Pupils feel more positive about their ability to learn effectively and to share the experience with others
- Teachers learn new practical techniques and tools that they can incorporate into their lessons
- Parents witness their children engaged in fun and creative learning experiences and see improved levels of confidence outside of school

Practicalities

Your Positively You event can be broken down as follows, depending on your timetable:

- 4 x 1-hour workshops
- 3 x 80-minute workshops
- 2 x 2-hour workshops

Each workshop can accommodate no more than 100 different students and can be delivered face-to-face or online.
